STABILUS makes technology comfortable

Trust earned
Vertrauen erarbeitet

Stabilus technology gives comfort
We provide gas springs and dampers with optimum function, meet the highest quality standards, and ensure constant technological leadership over the competition thanks to continuous product development. For the aftermarket, we keep a global inventory of a wide range of gas springs and dampers at the ready to ensure short term delivery.
We are the global market leader, our customers trust us.

Stabilus macht Technik komfortabel
Wir sorgen für optimale Funktion unserer Gasfedern und Dämpfer, werden den höchsten Qualitätsstandards gerecht, gewährleisten mit kontinuierlichen Produktentwicklungen einen ständigen technologischen Vorsprung gegenüber anderen Herstellern. Für den Ersatzteilmarkt bevorraten wir weltweit eine Vielzahl von Gasfedern und Dämpfern, um eine kurzfristige Lieferfähigkeit zu sichern.
Wir sind Weltmarktführer, unsere Kunden vertrauen uns.

La technologie Stabilus, source de confort
Nous veillons à ce que nos amortisseurs et vérins à gaz fonctionnent de façon optimale et qu'ils soient conformes aux normes de qualité les plus élevées. Nous vous garantissons de plus un avantage technologique permanent par rapport aux autres fabricants, à travers l'évolution continuelle de notre gamme de produits. Nous conservons au niveau mondial un stock important de pièces de rechange, afin de vous assurer une capacité de livraison réactive et efficace.
Leader sur le marché mondial, nos clients nous font confiance.

Stabilus hace que la tecnología sea cómoda
Nos preocupamos del óptimo funcionamiento de nuestros resortes de gas y amortiguadores, cumpli-mos los más altos estándares de calidad, y con el desarrollo continuo de productos tenemos una ventaja tecnológica permanente sobre otros fabricantes.
Para el mercado de repuestos disponemos a nivel mundial de una amplia gama de resortes de gas y amortiguadores para garantizar una entrega rápida.
Somos líderes mundiales, nuestros clientes confían en nosotros.

Con Stabilus la tecnologia diventa comoda
Le nostre molle a gas ed i nostri ammortizzatori funzionano in modo ottimale, nel rispetto dei più elevati standard qualitativi, assicurando un vantaggio tecnologico permanente rispetto agli altri produttori grazie ad uno sviluppo continuo del prodotto. Consegniamo velocemente in tutto il mondo innumerevoli ricambi di molle a gas ed ammortizzatori.
Siamo leader mondiali, i nostri clienti si fidano di noi.

Installation hints and tips on the correct installation of gas springs

Application
In their technical design, gas springs can be customized for special applications – on the basis of specifications and drawings. Match your application and requirements with us.
Our consultants and application engineers will be glad to help you.

Mounting Orientation
If possible, install gas springs so that the piston rod points down in the inactive state – unless they were designed for non-orientation specific installation. This will ensure optimum lubrication of the guide and sealing system at all times.

No Jamming
For a long service life, gas springs must not jam or be subjected to bending or lateral forces.
We offer suitable end fittings, such as angle joints. They will ensure non-jamming alignment.

Functional Safety
The functional safety of a gas spring comes mainly from the smooth piston rod surface and the seals that keep the gas pressure on the inside. Do not subject gas springs to bending stresses.
You should not install gas springs that have been damaged in after-sales mechanical processing.
Welding on the gas spring, as well as contamination or paint on the piston rod can cause device failure.
Avoid modifications and manipulations, impacts, tensile stress, heating, painting and removal of the print. Be on the safe side: Do not install defective or improperly altered products.

Temperature Range
Stabilus gas springs are designed for a default temperature range of -30°C to +80°C. Of course, there are also gas springs for more extreme applications.

Life and Maintenance
Gas springs are maintenance-free! They do not require greasing or lubrication. They are designed for their corresponding applications and should work flawlessly for many years.

Transportation and Storage
Store gas springs with the piston rod pointing down. Actuate the gas spring after 6 months of storage. Avoid damage: Do not transport gas springs as bulk material. Make sure not to contaminate gas springs with thin packaging film or adhesive tape.

Disposal
When gas springs are no longer needed, they should be disposed of in an environmentally correct manner. For this purpose they should be controlled degased, the compressed nitrogen gas bled, and the oil drained. For more specific details, please refer to STAB specification 1000 9375.
Please also consider our recycling instructions on our website http://www.Stabilus.com/service-spare-parts/recycling/

Einbauempfehlungen und wichtige Hinweise

Anwendung
Gasfedern müssen in ihrer technischen Auslegung auf die speziellen Anwendungen abgestimmt werden – auf der Grundlage von Spezifikationen und Zeichnungen. Stimmen Sie Anwendung und Anforderung mit uns ab. Unsere Berater und technischen Anwendungsingenieure helfen Ihnen gerne weiter.

Einbaulage
Vorzugsweise sollten Sie Gasfedern – außer sie sind für lageunabhängigen Einbau vorgesehen – mit im Ruhezustand nach unten gerichteter Kolbenstange einbauen. So sorgen Sie immer für eine optimale Schmierung des Führungs- und Dichtungssystems.

Verkantungsfrei
Um die Lebensdauer nicht zu beeinträchtigen, dürfen Gasfedern keine Verkantungen, Biege- oder Querkräfte erfahren. Wir bieten Ihnen geeignete Anschlussstücke wie z.B. Winkelgelenke. So stellen Sie eine verkantungsfreie Anlenkung sicher.

Funktionssicherheit
Die Funktionssicherheit der Gasfeder ergibt sich maßgeblich durch die glatte Kolbenstangenoberfläche und durch Dichtungen, die den Gasdruck im Inneren halten.
Setzen Sie Gasfedern keinen Biegebelastungen aus.
Stabilus Gasfedern sollten Sie nicht einbauen, wenn sie durch nachträgliche mechanische Bearbeitung beschädigt wurden. Schweißungen an der Gasfeder sowie Verunreinigungen oder Farbe auf der Kolbenstange können zum Ausfall der Geräte führen.
Vermeiden Sie Änderungen und Manipulationen, Schlageinwirkung, Zugbelastungen, Erhitzen, Über-lackieren oder die Aufdruckentfernung. Gehen Sie auf Nummer sicher: Bauen sie keine defekten oder unsachgemäß bearbeiteten Produkte ein.

Temperaturbereich
Der Standardtemperaturbereich, für den Stabilus Gasfedern ausgelegt sind, liegt zwischen -30°C und +80°C. Selbstverständlich sind auch Gasfedern für extremere Belastungen erhältlich.

Lebensdauer und Wartung
Gasfedern sind wartungsfrei!
Es bedarf keiner Wartung wie Ölen oder Fetten. Sie sind stets für die jeweiligen Anforderungen ausgelegt und arbeiten über viele Jahre hinweg störungsfrei.

Transport und Lagerung
Wenn Sie Gasfedern einlagern, sollte die Kolbenstange nach unten gerichtet sein. Betätigen Sie die Gas-federn spätestens nach 6 Monaten Lagerung. Vermeiden Sie Beschädigungen: Transportieren Sie Gasfedern nicht als Schüttgut. Achten Sie auch darauf, dass Gasfedern nicht durch dünne Verpackungsfolien oder Klebebänder verunreinigt werden.

Entsorgung
Werden Gasfedern nicht mehr benötigt, sollten sie umweltgerecht entsorgt werden. Dazu werden sie kontrolliert entgast, um das komprimierte Stickstoffgas sowie das enthaltene Öl abzulassen. Genauere Hinweise dazu sind der STAB-Spec. 1000 9375 zu entnehmen. Bitte beachten Sie auch die Entsorgungsempfehlungen auf unserer Internetseite http://www.Stabilus.de/service-ersatzteile/recycling/

The environment – not just empty words
Umwelt – nicht nur eine Phrase

To be the market leader means taking responsibility, being better than others, being a role model, setting standards.

Of course, this also applies to the environment and environmental compatibility.

We are certified according to the EU Eco-Management and Audit Scheme (EMAS) as well as the globally valid DIN EN ISO14001 environmental management system.

We optimize processes, improve manufacturing and product quality, and thereby positively affect our energy, water and raw materials consumption, and can reduce effluents, waste and emissions.

Do your part by recycling properly. You can find our recycling instructions at:

http://www.stabilus.com/service-spare-parts/recycling/

Marktführer sein heißt Verantwortung übernehmen, besser sein als andere, Vorbild sein, Standards setzen.

Dies gilt natürlich auch für das Thema Umwelt und Umweltverträglichkeit.

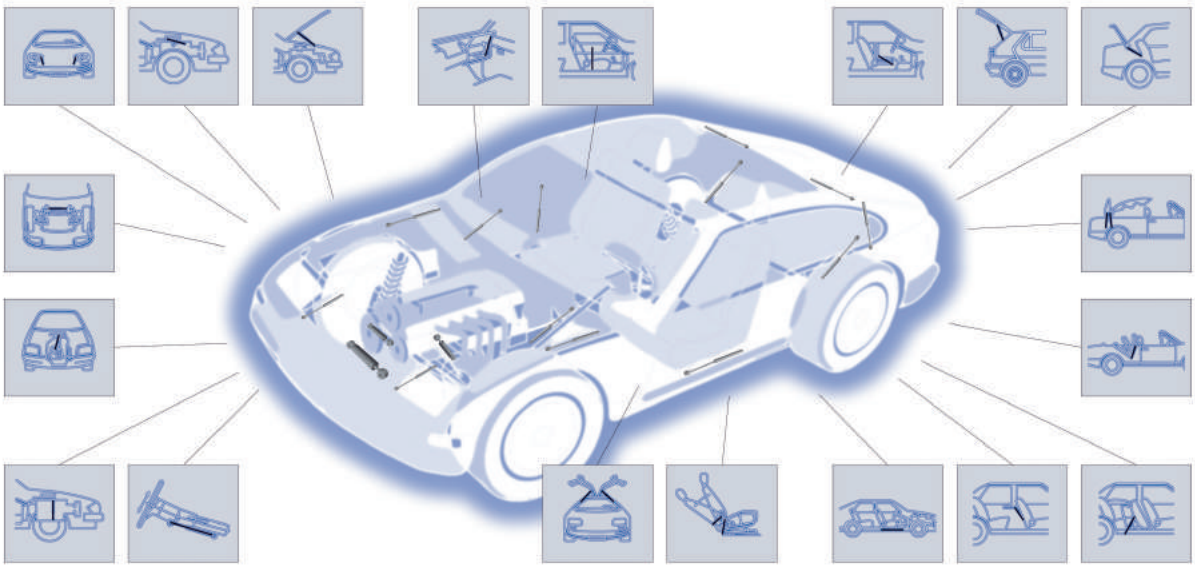
Wir sind nach der EG-Öko-Audit-Verordnung (EMAS) als auch nach dem weltweit gültigen Umweltmanagementsystem DIN EN ISO14001 erfolgreich zertifiziert.

Wir optimieren Prozesse, verbessern Fertigungsqualität wie Produktqualität, womit wir direkt positiven Einfluss auf Energie-, Wasser- und Rohstoffverbrauch nehmen sowie Abwasser, Abfall und Emissionen reduzieren.

Helfen auch Sie mit und entsorgen Sie fachgerecht. Unsere Hinweise zur Entsorgung finden Sie unter:

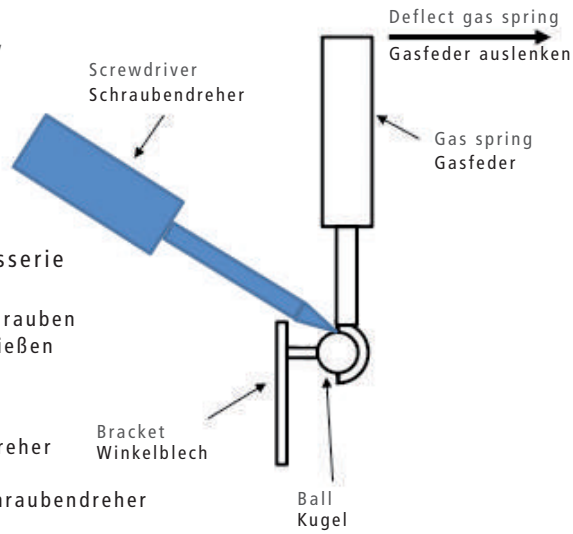
http://www.stabilus.de/service-ersatzteile/recycling/

Everywhere – Überall



Removal and installation instructions

- Removing the **old gas spring** including end fittings from the body
  1. Open the trunk lid/hood and provide support to hold it open.
  2. Unscrew the angled plate and ball pivot including the gas spring from the body.
  3. After removing the gas spring, close the trunk lid/hood.
- Separating the gas spring from the end fittings (see sketch)
  1. Chuck the angled plate in a suitable locating fixture.
  2. Deflect the gas spring, and, at the same time, insert a small flat head screwdriver between ball pivot and ball socket.
  3. Using the small flat head screwdriver, push the circlip of the ball socket into the appropriate groove.
  4. Carefully pry the gas spring off the ball.
  5. **Repeat the above 4 steps accordingly to remove the ball pivot.**
- Installing the new gas spring including end fittings on the body
  1. Open the trunk lid/hood and provide support to hold it open.
  2. Screw the angled plate and ball pivot into their original spots on the body.
  3. Install the new gas spring with the suitable ball sockets.



Aus-/Einbauanleitung:

- Demontieren der **alten Gasfeder** mit Anschlüssen von der Karosserie
  1. Heckklappe / Motorhaube öffnen und abstützen
  2. Winkelblech und Kugelzapfen inkl. Gasfeder von der Karosserie abschrauben
  3. Wenn die Gasfeder demontiert ist, die Heckklappe / Motorhaube schließen
- Trennen der Gasfeder von den Anschlüssen (siehe Skizze)
  1. Winkelblech in eine geeignete Aufnahme einspannen
  2. Gasfeder auslenken und dabei einen kleinen Flachschlitz-Schraubendreher zwischen Kugelzapfen und -pfanne führen
  3. Den Sicherungsring der Kugelpfanne mit dem kleinen Flachschlitz-Schraubendreher in die vorgesehene Nut drücken
  4. Die Gasfeder vorsichtig von der Kugel runter hebeln
  5. **Die 4 Schritte für das Entfernen des Kugelzapfens entsprechend wiederholen**
- Montieren der **neuen Gasfeder** mit Anschlüssen an der Karosserie
  1. Heckklappe / Motorhaube öffnen und abstützen
  2. Winkelblech und Kugelzapfen in ihre ursprünglichen Plätze an der Karosserie schrauben
  3. Neue Gasfeder mit den geeigneten Kugelpfannen einbauen

Automotive gas springs and dampers
Gasfedern und Dämpfer im PKW

LIFT-O-MAT®

A gas spring that is easy on materials, with dynamic extension and compression damping. With extension damping, the gas spring will open to a predetermined position. There, it will end the process in a harmonious motion. Compression damping ensures a smooth finish when closing. Typical application: Engine hoods.

Eine Material schonende Gasfeder mit dynamischer Ein- oder Ausschubdämpfung. Mit Ausschubdämpfung öffnet die Gasfeder zu einer vorbestimmten Position. Dort beendet sie den Vorgang in einer harmonischen Bewegung. Die Einschubdämpfung sorgt beim Schließen für einen schonenden Abschluss. Typisches Einsatzgebiet: Motorhauben.

LIFT-O-MAT® Alu

Regarding force assist and damping, the light-weight gas spring with aluminum pressure tube has the same properties as the standard version of the LIFT-O-MAT. Depending on their dimensions, LIFT-O-MAT ALU can save up to 30 % in weight. The polished metal surface gives this light-weight gas spring the look of a true high-tech product.

Die Leichtbaugasfeder mit Aluminiumdruckrohr verfügt in puncto Kraftunterstützung und Dämpfung über dieselben Eigenschaften wie die Standardversion des LIFT-O-MAT. LIFT-O-MAT ALU bringt je nach Druckrohrabmessung eine Gewichtsersparnis bis zu 30 %. Die polierte Metalloberfläche macht diese Leichtbaugasfeder auch optisch zu einem echten High-Tech-Produkt.

HYDRO-LIFT®

Functions like LIFT-O-MAT, equipped with an additional holding function. Will lock safely in any position within defined limits. Rigid or spring lock can be implemented.

In der Funktionsweise wie ein LIFT-O-MAT, zusätzlich mit einer Haltefunktion ausgestattet. Arretiert sicher in jeder Position innerhalb definierter Grenzen. Starre oder federnde Blockierung ist realisierbar.

ELEKTRO-LIFT®

Gas spring with electrical contact at the mounting ends in three variants: As a ground conductor, as a permanent current conductor, and as a switch controlled by lifting - e.g., for lighting trunks, rear window wipers.

Gasfeder mit Elektrokontakt an den Anschlussenden in drei Varianten: Als Masseleiter, als permanenten Stromleiter und als hubgesteuerten Schalter z.B. zur Schaltung von Kofferraumbeleuchtung, Heckscheibenwischer.

STAB-O-SHOC®

Oil-hydraulic motion or vibration damper. Ideally, the motion damper will be used in steering systems and belt tensioner systems, as well as for damping drive unit vibrations.

Ölhydraulische Bewegungs- oder Schwingungsdämpfer. Die Schwingungsdämpfer werden idealer Weise in Lenksystemen und Riemenspannsystemen sowie zur Schwingungsdämpfung des Antriebsblocks eingesetzt.

INTER-STOP®

A dynamically dampened gas spring that allows dividing the opening angle of a lid into several functional areas. Other functions like LIFT-O-MAT.

Eine dynamisch gedämpfte Gasfeder mit der, der Öffnungswinkel einer Klappe in mehrere Funktionsbereiche aufgeteilt werden kann. Ansonsten Funktionen wie LIFT-O-MAT.
